- ✓ Government grants and the opportunity to receive bonuses

*depending on the respective driving style and environmental influences

THE FIT-OUT

TAILORED TO YOUR NEEDS

You have the full flexibility to adapt the fittings to your area of responsibility. You can adapt the fit-out to changes, thanks to the iPEK compatibility our products are not in the way. During your personal consultation and when creating your desired fit-out, we orientate ourselves on two concepts: longitudinal and transverse fit-out. These offer well thought-out use of space and maximum comfort in daily use.

LONGITUDINAL

- ✓ High safety due to passage area in the vehicle
- ✓ Separation between wet and office area through sliding door
- ✓ Direct communication between the inspectors possible
- ✓ Enables the inspector to have a clear view of the rear area

Longitudinal fit-out with DCX5000

TRANSVERSE

- ✓ Complete separation between wet and office areas
- ✓ Generous room layout and plenty of desk space
- ✓ Enables concentrated working, as noises are excluded

Transverse fit-out with DCX5000

Longitudinal fit-out with 500m main sewer, SAT system and push system

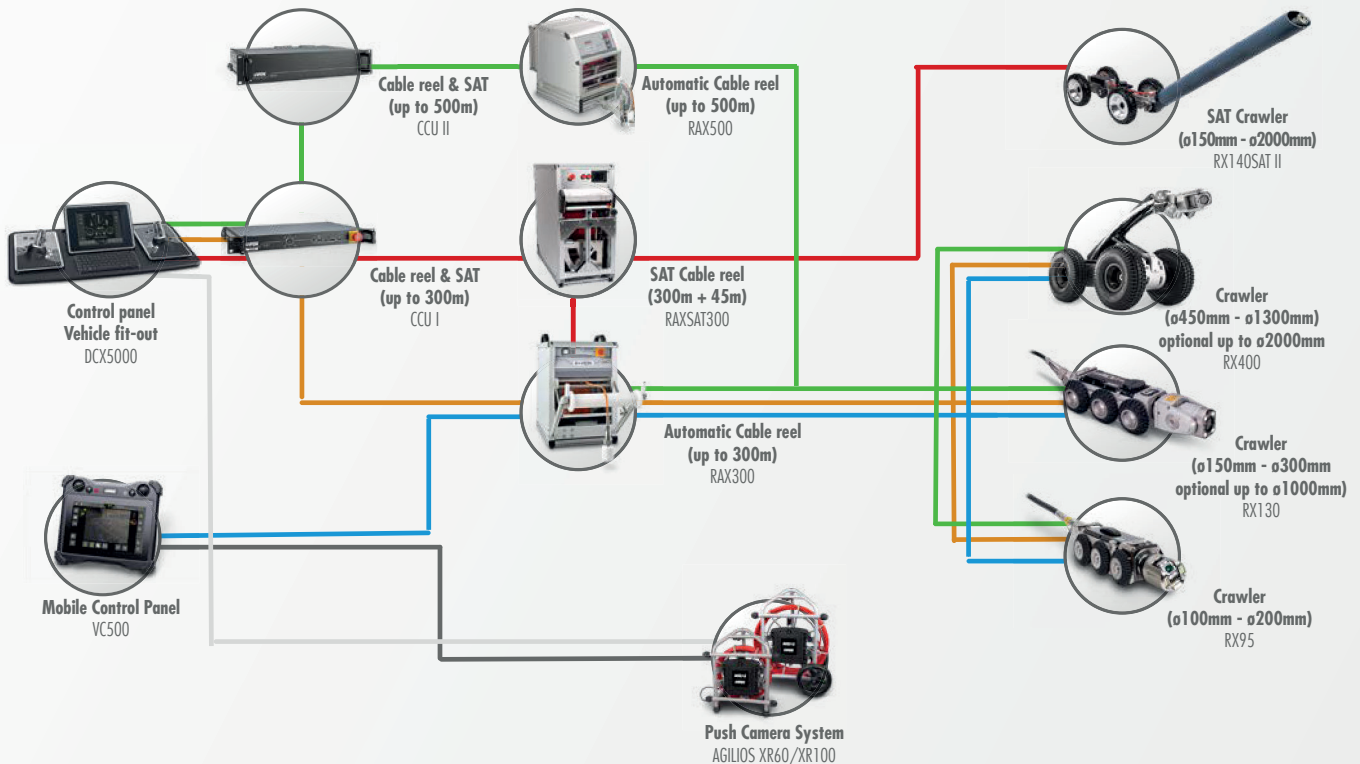

Transverse fit-out with 300m main sewer system and push system

CONFIGURE YOUR SYSTEM

The starting point of every configuration is our control panels. Our multifunctional, ergonomically designed DCX5000 control panel supports you in all inspection tasks so that you can perform them centrally and without becoming tired. Due to its mobility, the VC500 also offers the advantage of being used as a mobile control unit, e.g. on the AGILIOS. By using our control panel DCX5000 you are not bound to any specific inspection software. You can use all of them, no matter if WinCan, Haite or other.

CONFIGURE YOUR SYSTEM ACCORDING TO YOUR NEEDS:
